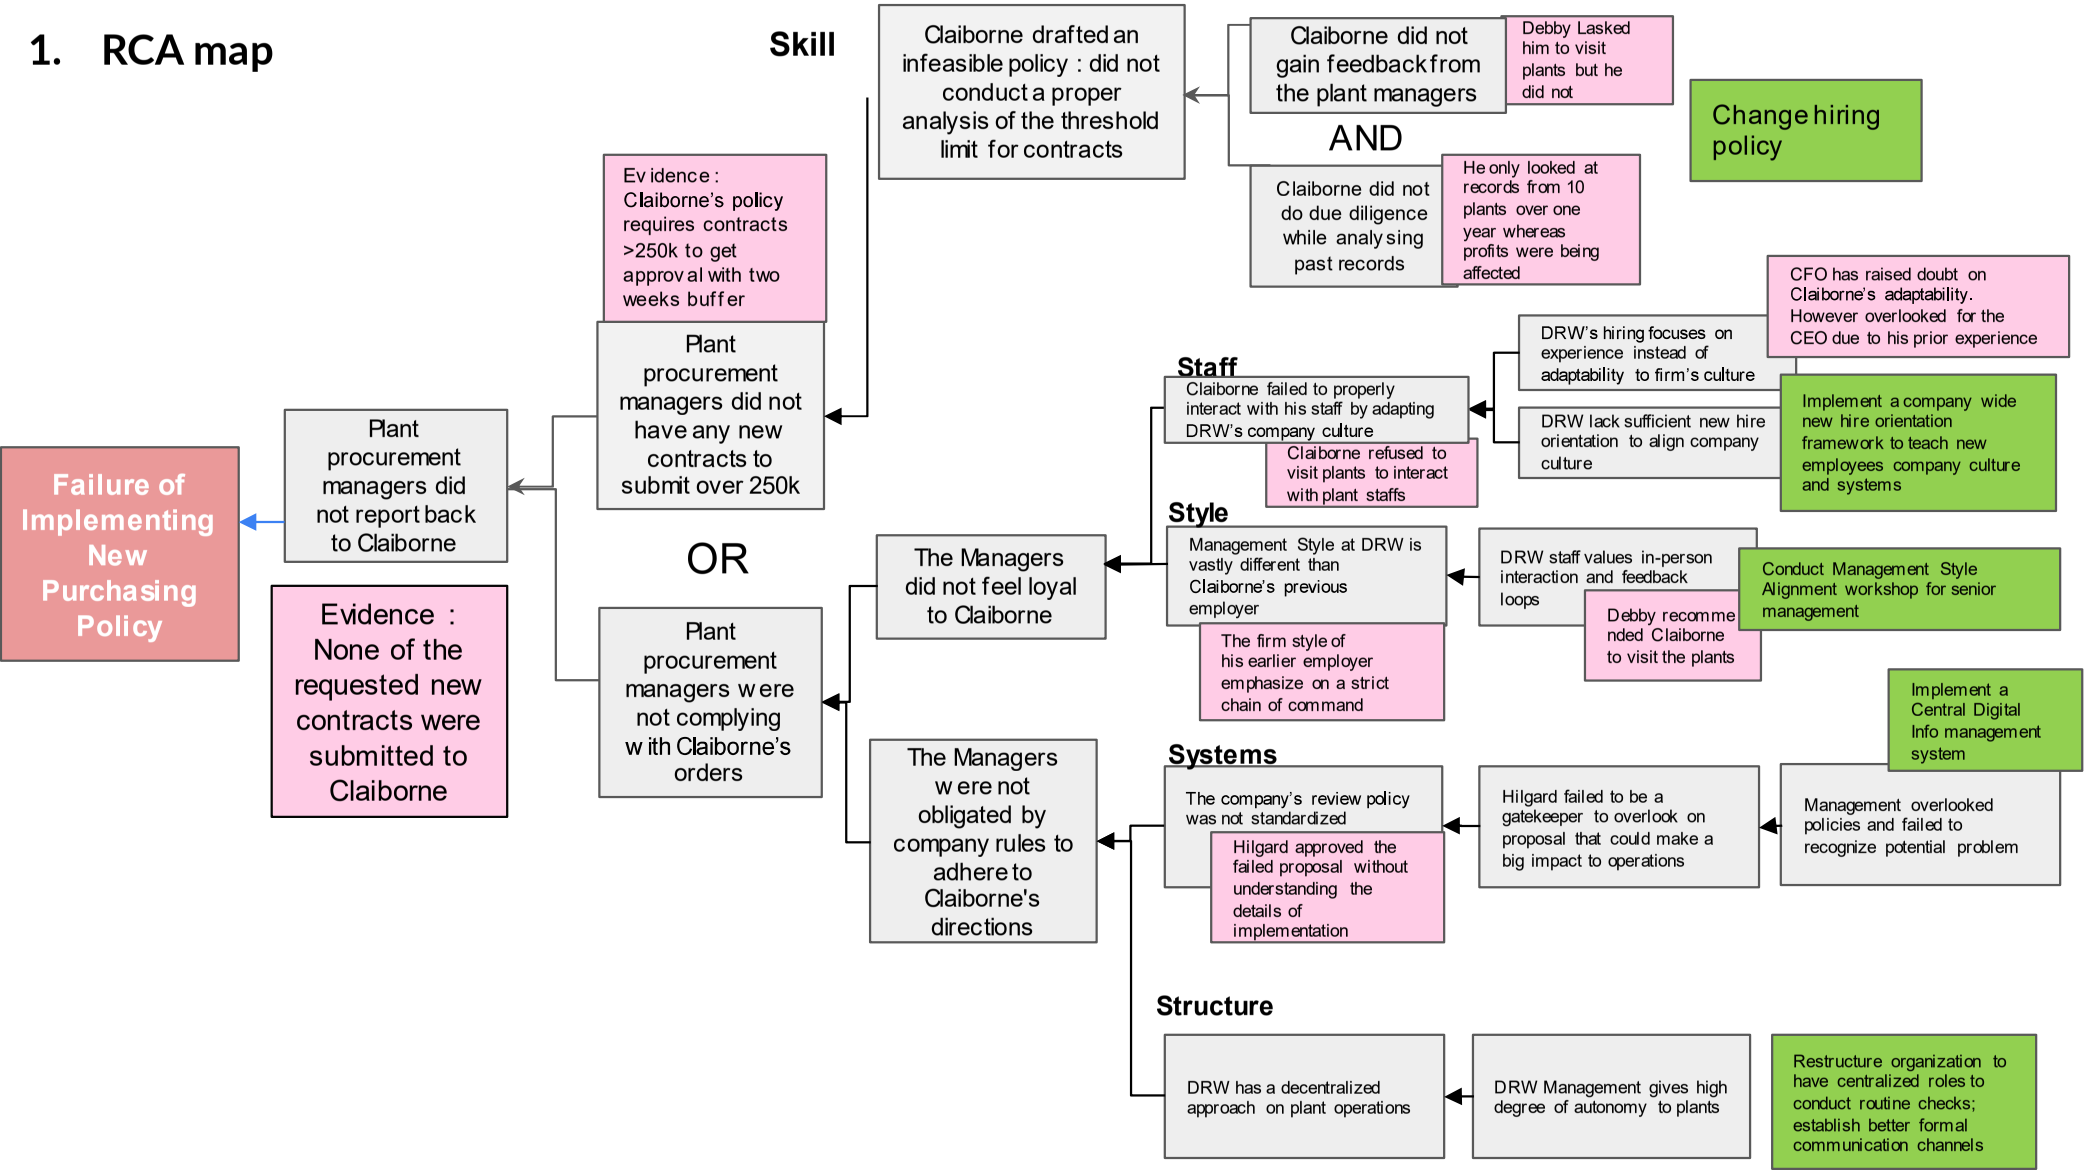
1. RCA map



Failure of Implementing New Purchasing Policy
Plant procurement managers did not report back to Claiborne
Evidence : None of the requested new contracts were submitted to Claiborne
Plant procurement managers did not have any new contracts to submit over 250k
Evidence : Claiborne's policy requires contracts >250k to get approval with two weeks buffer
OR
Plant procurement managers were not complying with Claiborne's orders
Skill
Claiborne drafted an infeasible policy : did not conduct a proper analysis of the threshold limit for contracts
Claiborne did not gain feedback from the plant managers
Debby Lasked him to visit plants but he did not
AND
Claiborne did not do due diligence while analysing past records
He only looked at records from 10 plants over one year whereas profits were being affected
Change hiring policy
The Managers did not feel loyal to Claiborne
Staff
Claiborne failed to properly interact with his staff by adapting DRW's company culture
Claiborne refused to visit plants to interact with plant staffs
DRW's hiring focuses on experience instead of adaptability to firm's culture
CFO has raised doubt on Claiborne's adaptability. However overlooked for the CEO due to his prior experience
DRW lack sufficient new hire orientation to align company culture
Implement a company wide new hire orientation framework to teach new employees company culture and systems
Style
Management Style at DRW is vastly different than Claiborne's previous employer
The firm style of his earlier employer emphasize on a strict chain of command
DRW staff values in-person interaction and feedback loops
Debby recommended Claiborne to visit the plants
Conduct Management Style Alignment workshop for senior management
The Managers were not obligated by company rules to adhere to Claiborne's directions
Systems
The company's review policy was not standardized
Hilgard approved the failed proposal without understanding the details of implementation
Hilgard failed to be a gatekeeper to overlook on proposal that could make a big impact to operations
Management overlooked policies and failed to recognize potential problem
Implement a Central Digital Info management system
Structure
DRW has a decentralized approach on plant operations
DRW Management gives high degree of autonomy to plants
Restructure organization to have centralized roles to conduct routine checks; establish better formal communication channels

2. Solutions table

No.	Solution Description	Who	Months
1	**System :-** Create a central digital management system with information of machinery vendors for each plant, inventory for each plant and digital procurement system	CTO, VP of procurement	6
2	**Staff+Skills :-** Implement a comprehensive hiring system and design new hire orientation framework to familiarize new employees with company culture, structure and systems	Head of Human Resource and CEO	3
3	**Structure :-** Restructure organization to have centralized roles to conduct routine checks on individual plants; establish better formal communication and collaboration channels between plants	CEO	12
4	**Strategy :-** Given changes in market, along with cutting costs in procurement DRW should pivot sales strategy and revise pricing to meet annual profit targets	CEO, CFO, Head of Sales	6
5	**Style :-** Ensure alignment of management styles across the senior-level management by training workshops	Chief People Officer	12

3. An email to DRW Technologies CEO Hilgard in 5-Step Persuasive Selling format

Dear Ms. Hilgard,

For the past 3 years, many of the plants in your company have been missing their profit targets which can greatly impact your future operations. The new corporate VP of Procurement Claiborne stepped in and introduced a new policy, however, the implementation of the new policy was not received well. The root causes for this issue are the decentralized company structure with ambiguity in culture and management style across levels, poor hiring and training policy, inadequate skill set of corporate VP, and outdated information management system.

To achieve target profits and implement cost cutting strategy in procurement, I recommend the creation of a new central digital information management system, updating the hiring and training policy for new employees, restructuring the organization to more centralized format and ensuring alignment of managemnt style across company levels.

The benefits of this approach would be that you would have instantaneous access to nation wide procurement data and efficiently cut costs on bulk orders from suppliers. You would achieve coherence in company culture which would make it easier to manage employees across plants.

I would like to meet with you over lunch to go over the details of this plan. Could we schedule a meeting through your admin?

Sincerely,
Bruce Lee
