The Hong Kong University of Science and Technology
Department of Electronic and Computer Engineering

ELEC2400 **ELECTRONIC CIRCUITS** FALL 2026-27

Lab Section No. : _____ Date : _____

Name : _____ Student Number : _____

Name of group partner : _____

LAB 1(a) – Instrumentation and Measurement
Answer Sheet

Q1. What is the phase difference θ between the sine waves? θ = _____

Q2. Sketch the waveform of $V_A(t)$ and $V_1(t)$ when measuring the phase difference θ from Q1, with clear labels. (Screen captures are not accepted: you cannot use Channel A or B to specify).

Q3. What is the phase difference θ using the Lissajous plot? θ = _____

Q4. Sketch the waveform of $V_A(t)$ and $V_1(t)$ when measuring the phase difference θ from Q3, with clear labels. (Screen captures are not accepted: you cannot use Channel A or B to specify).

Q5. What is $V_A(t)$, when $V_1(t)$ is $2*\sin(2\pi*1000*t)$ V? $V_A(t)$ = _____

Q6. Show the circuits and waveform to TA. Demonstration code (TA) : _____
